Password
Re-enter Your Password
Enter Email Address

Review and Select Terms of Service
Click on Registration or Select Registration from the Menu

Login:

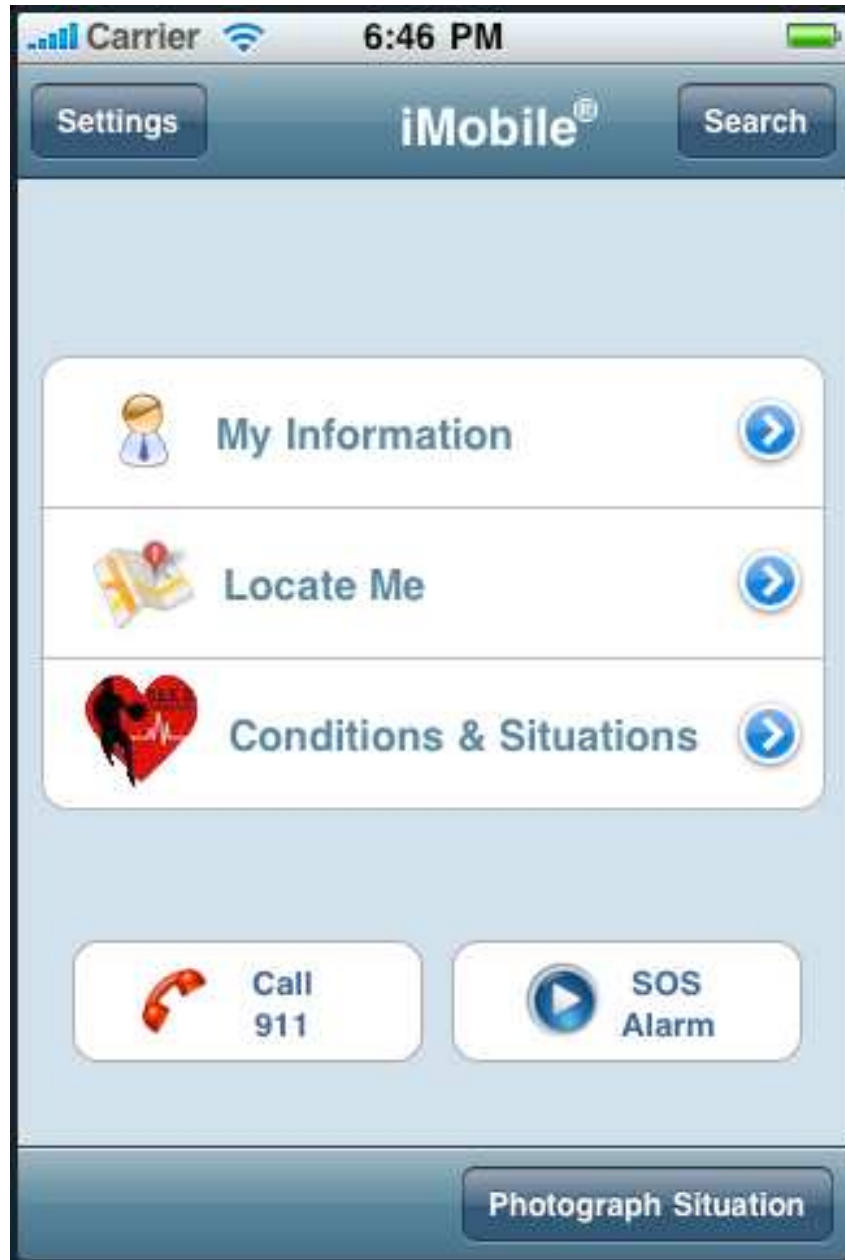

Enter your username and Password. Then login to the iMobile Care application.

Enter Username, Password. Then click Login.

Main Menu

The Main Menu screen will display a successful login as follows:

Follow the [Steps](#) to set up your iMobile Care App.

Click on **Setting**:

Adjust all personalized settings by clicking on the settings icon located at the top left-hand corner of the Main screen on the iMobile Care app.

Emergency notes / Special Instruction

a). If you wish to input an emergency note or special instructions, please keep these messages brief, as there's not much space on a mobile phone screen. For example:

“Help me. Choking...”

“Help me. Insect bite. Allergic reaction”.

For special instructions, these are some examples you could type in, depending on the event, condition or situation:

“My medication ____ is in my briefcase.”

"My inhalator is in my handbag."

Select Condition: Select any condition related or specific to you or your condition. This information will appear on the SOS Screen

Select Info: Select a specific category for the condition, if provided. For example: Bites and Stings. You may wish to display "Jellyfish Stings", before entering the water.

Repeat: This will determine the number of times the SOS will sound.

Country: Make sure you input the country (the country you are in at the present time, or that particular time) by scrolling to the correct country so that the main screen on the iMobile Care app will reflect the correct emergency code number for that country (911 for USA).

My Information:

You can store your personal medical Information for quick reference:

To input data into your "My Information" screen, you need to first touch or click the edit button. Then you can put in whatever information you wish. For submitting your photo, you will need to upload a photo from your library database on your Device database or take a quick photo, which you can store in your library. Make sure you click on "Save" to insure all the information will remain on the iMobile Care app.

Locate Me:

Locate Me will provide your specific location. It is integrated with the GPS of your device; so make sure your GPS is set to GPS Service: Location on these setting can be found in: Options ----- Advanced Options --- GPS – GPS Services.

Condition and Situations:

This will provide a Reference Guide about various Conditions and Situations and the type of recommended air or care:

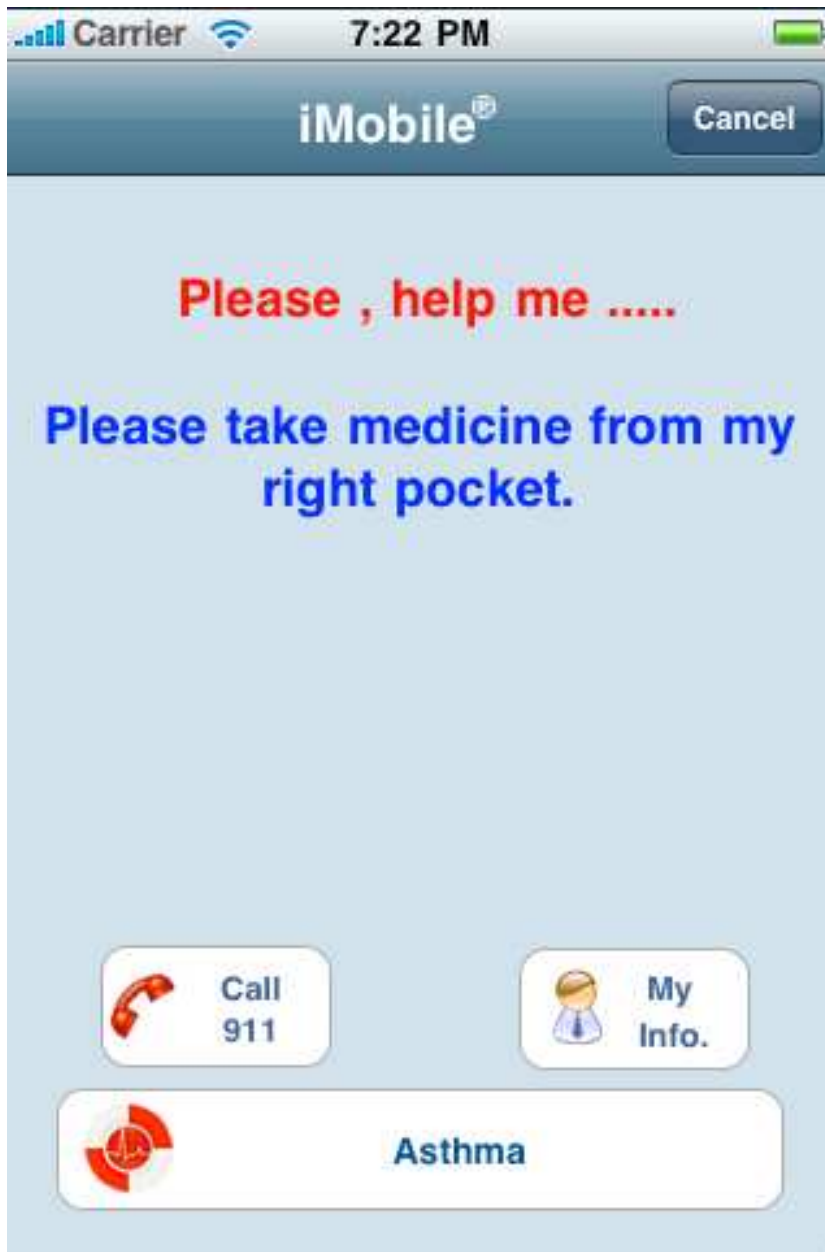

SOS:

You may press the SOS button to signal you are in distress.

If you accidentally touch the emergency or SOS button on the main screen, a screen will pop up which will ask you to "Cancel" or "Sound". Please use this SOS feature only during serious events.

A confirmation message will appear:

Search

Search will allow you to search in Conditions and situations.

Photograph Situation:

The button "Photograph Situation" on the bottom of the main screen enables you or someone else to take photos of your condition or situation, such as an insect or jellyfish bite, an abrasion, or damage to your car after an accident, and which subsequently you may store in your library on the device

More Tips:

Always make sure you never put YOUR own safety at risk. Always survey the surroundings and location. In extreme critical events, contact Emergency before using the iMobile Care app.

Do your best to keep calm and try to keep individual(s) as relaxed as possible. Speak clearly and with a confident tone.

When there are multiple parties in critical situations, ALWAYS treat or provide care for the individual(s) who are at the greatest risk or in the most danger.

Monitor the conditions of individual(s) in distress before emergency personnel arrive.

Try to place the individual(s) in distress in a safe comfortable environment.

Do not supply narcotics, alcohol, energy drinks, or nicotine to individuals in distress. Follow the iMobile Care app for guidance on what to do, depending on the particular situation or condition.
